How to read a reversed card

A card is reversed when it lands upside down. Read it as the upright meaning turned inward, blocked, delayed or overdone. It is rarely the plain opposite. If you prefer not to use reversals, turn every card upright and read the upright column only.

How to use this sheet

Look at the picture first and say what you see. Then check the keywords, pick the one that fits your question, and read the love or career line if the question is about either. The yes or no lean is for the upright card and works best with single-card questions.
